The Practice Referral Management Service

Delivering a Referral Management Services (RMS) to the NHS since 2006.

Key RMS Facts:

- We have produced data for the commissioners to help shape their future commissioning intentions.
- Creates opportunities to develop bespoke education programmes for the referring population based on the prevalence of inappropriate referrals. For example, education sessions held for GPs on heart failure led by lead cardiology triagers.
- Our operational team have visited individual GP practice’s medical secretaries to increase the surgeries understanding of the local referral pathways.

An experienced provider of Referral Management Services.

The Practice Group is experienced in delivering Referral Management Services to the NHS and has been since 2006 across 18 RMS and Community Services Contracts to 20 CCGs. Our Referral Management Centre (RMC) processes 87,000 referrals and books 132,000 appointments per annum.

When our RMS service commenced there were only community services for five specialities; Ophthalmology, Cardiology, ENT, Dermatology and MSK.

Since then the map of community services significantly increased and as a direct result of the data and results generated by RMS, the CCG commissioned/procured new community services for additional specialities including: gynaecology, urology and respiratory medicine. The existing ophthalmology and MSK services were decommissioned and new services were procured for those specialities, which were more suitable for the levels of activity appropriate for community services.

The clinical triage element guarantees that the patients are signposted to the appropriate level of care and as a result more than 60% of cases are redirected from the secondary care to the community services. The initial increase in demand has resulted in the following providers expanding their capacity to cope with the increased levels of activity (ENT, Cardiology, Dermatology, MSK Bletchley Therapy Unit, Ophthalmology).

5 Distinct Stages:

Our Referral Management Service has five distinct stages that ensure patients are seen in the right place, at the right time, first time:

1. Referral registration
2. Clinical triage
3. Appointment booking
4. Referrer education
5. Reporting and analysis

Our overall service delivery model and approach to quality assurance is underpinned by our robust governance and reporting processes that allow The Practice Group to provide our commissioners with real-time data regarding referrals that can be used to shape future commissioning intentions and services.

The benefits of using our Referral Management Service:

- Provides a single point of entry into the local healthcare system
- Improved patient pathways – right treatment, right place and right time
- Diverts clinically appropriate referrals from secondary care into lower cost tier two or community services
- Reduced demand on hospital services through utilising local community services
- Improved data capture for informing and accuracy
- Improves long-term GP referral patterns through identifying area of educational need and facilitating a feedback loop
- Provide an educational work stream that supports GPs in decision making
- Improves levels of patient confidence and satisfaction with the referral process

Provider & Referrer Testimonials:

“Good communication, efficient and helpful staff”

“They’ve always been helpful when any queries or complaints have arisen”

“Good service and appropriate referrals”

“Overall very good, efficient service”

The Practice Referral Management Service

Delivering a Referral Management Services (RMS) to the NHS since 2006.

Case Study: Milton Keynes Referral Management Service

In November 2013 The Practice Group were awarded the contract for the provision of a Referral Management Service including clinical review, patient choice and booking for NHS Milton Keynes Clinical Commissioning Group (CCG). Following engagement meetings and swift mobilisation the service started accepting referrals from 20th January 2014. From the service commencement 100% of local GP practices used the service to process their referral.

The Practice Group has worked closely with Milton Keynes CCG to ensure a smooth adoption of the service. We maintain a consistent supportive presence in the area. Representatives from The Practice Group are constantly active, liaising with local referrers and providers to ensure there is a full understanding of the criteria of each individual service, thus ensuring that patients are triaged into the right service first time.

Achievements of the service

The service has had a significant impact, with great benefits seen by patients, GP’s and especially Milton Keynes CCG.

- 100% of referrals triaged within one working day
- 100% of patients offered a choice of provider when booking their appointment
- 100% of patients booked within three working days
- 100% GP practices in Milton Keynes use the RMS service - achieved within one month of implementation.
- Increased demand in the community for triaged specialities
- Decreased waiting times for an appointment in secondary care
- 10% increase in the conversion rates from appointment to surgical procedures for MSK orthopaedic secondary care services
- Accurate reporting data captured and shared with the CCG
- Ad hoc reporting facility available
- ‘Live’ feedback on referral patterns informing commissioners on suggested educational topics
- 100% contractual KPI objectives met

MK RMS Key Statistics:

- 100% of GP Practices in Milton Keynes uses the RMS service - achieved within on month of implementation.
- 100% of referrals triaged within one working day
- 100% of patients booked within three working days.

Patient Testimonials:

“This is very well organised and hearing a happy and helpful voice is lovely.”

“This service has been very good.”

“Good efficient service.”
